

# Solar-Log 350 LAN

PV Production monitoring + LAN Connection

Solar-Log 350 LAN

The Solar-Log 350 LAN provides revenue grade metering for solar PV plants in locations where cell service is weak or unavailable. The LAN connection increases the number of times data is transferred per day, giving near real time visualization of plant data for system owners and installers. This plug and play socket meter is compatible with all residential solar PV plants, is compatible with all major inverter brands and comes with 5 years of Solar-Log WEB Enerest™ monitoring services.
